Introduction

Creating a resume is a bit tedious task for any working professional from any industry. One has to keep it short, simple, with the latest work experience and constantly update it over a while. It is an application that simplifies the task of creating a resume for individuals. The system is flexible to be used and reduces the need of thinking and designing an appropriate resume according to qualifications. The system is developed to provide an easy means for creating a professional looking resume. Individuals just have to fill up a form that specifies questions from all required fields such as personal questions, educational, qualities, interest, skills and so on. The answers provided by the users are stored and the system automatically generates a well - structured resume. Users have option to create resume in any format and file.

Analysis and feature

- It is an application that simplifies the task of creating a resume for individuals. The system is flexible to be used and reduces the need of thinking and designing an appropriate resume according to qualifications. The system is developed to

provide an easy means for creating a professional looking resume. Individuals just have to fill up a form that specifies questions from all required fields such as personal questions, educational, qualities, interest, skills and so on. The answers provided by the users are stored and the system automatically generates a well structured resume. Users have option to create resume in any format and file.

Objectives

- The main objective of the Online Resume Builder is to manage the details of Resume , Job , Individual , Skills ,Qualification. It manages all the information about Resume, Jobseeker, Qualification, Resume. The project is totally built at administrative end and thus only the administrator is guaranteed the access. You will develop a web application that will autogenerate a nice and properly formatted Resume from the information filled up in a form. Project Context Creating a resume is a bit tedious task for any working professional from any industry. One has to keep it short, simple, and with the latest work experience, and constantly update it over a while. This project will help you through the process that can be followed to build your resume-builder using ReactJS and NodeJS. Implementing the project will give you the satisfaction of auto-generating it on your own and helping working professionals with the same. It is an application that simplifies the task of creating a resume for individuals. The system is flexible to be used and reduces the need of thinking and designing an appropriate resume according to qualifications. The system is developed to provide an easy means for creating a professional looking resume.

Individuals just have to fill up a form that specifies questions from all required fields such as personal questions, educational, qualities, interest, skills and so on. The answers provided by the users are stored and the system automatically generates a well structured resume. Users have option to create resume in any format and file.

Scope

- Resumes can also be classified according to different branches and for specific companies.

For example:-

If someone has more practical experience and less CGPA/Percentage and resume should emphasize on project of the person more.

Output:

Advantages

Provides instant resume to individuals. •

There are choices available for resume •format for users as per their qualification and requirements.

Reduces tedious work in thinking and creating resume and is

Convenient for users.

Provides quick access and is affordable.

The system saves time and reduces human efforts.

for the resume builder to be able to complete your resume.

- ## Disadvantages

- It requires internet connection.

Sometime user wants customized resume that is not possible in the system.

- You still have to input your information onto the page or software

Often you are restricted to use the builder's fonts and formats.

Some of the resume builders only provide you with a PDF copy of your resume which again restricts you for further adaption or updating.

- ## Conclusion

- The online resume builder is one of the most fantastic systems for the people who are either recently graduated students in their domain or if they don 't have enough idea about the resume or don't have enough time to create the

resume of good designs or patterns, then this platform is a very productive place for them. ARB(Analytical Resume Builder) will analyse and give the required output of top trending technologies with proper proof of data, graphs and statistics. Thus students can analyse the material and course which they can opt for which will be more useful to them in their placements and future. It will be a clear path and guide which) will make their decision much more easy and effective. There will be a less chance of regretting and wasting their time on different courses which are not worth.
